

Tuesday Talks

April 17, 2018 6:PM-7:30PM

Neuromuscular Diagnosis – A Closer Look at SMA

Child Neurology Consultants of Austin

6811 Austin Center Blvd. Suite 400

Austin, TX 78731

If your child has one of the many neuromuscular conditions, you will want to join us for this Tuesday Talks. We will be focusing on SMA- the new medications available, what to expect with the new medication, how it works, as well as other treatments available. We will also talk about the local [MDA Clinic](#) and the resources and services it offers.

[Child Neurology Consultants of Austin](#) recently added a new specialist to their team that has great experience with neuromuscular conditions. This is a chance to meet [Dr. Cardon](#) and see how she may be able to help with your child's plan of care. As always, we will also live stream this event for any family that is not able to attend.

Se habla Español – *Ofrecemos servicio de intérprete español para esta reunión. Responda enviando un correo electrónico a info@caseyscircle.org para informarnos cuántos adultos y niños asistirán.*

Casey's Circle

Caseyscircle.org
Austin, TX
